Perfectio X™

Designed by Zero Gravity in USA
www.zerogravityskin.com

The Zero Gravity Light Therapy System was created with one main principle in mind: to deliver the safest and most effective LED device for pain management and skin rejuvenation. As a world leader in the field of phototherapy, Zero Gravity was able to achieve this goal and bring to life the best LED medical device on the market today – **The Perfectio X**.

Over the last few years, LED light therapy has been adopted by the world's leading dermatologists due to its proven benefits to the skin. It is currently being used by more board-certified medical physicians in the United States and around the world, treating chronic pain, inflammation, nerve damage, and athletic recovery. Now you too can take advantage of the most advanced cutting edge technology wherever you are - at home and on the go.

The Perfectio X is an innovative light therapy device, designed to provide incredible anti aging benefits as well as treat chronic pain and decrease inflammation at the source.

Perfectio X for pain relief:

The Perfectio X provides damaged cells with the vital energy necessary to quickly renew and recover in the most optimal way. The powerful LED red and infrared beams penetrate deeply into your skin, muscles and joints. The light photons are absorbed by photoacceptors in your cells' mitochondria, which convert the light into ATP - the fuel that enables cells to perform cellular tasks and biological processes. This boost of energy at the cellular level increases the circulation in the blood vessels, micro-repairs tissues, and decreases inflammation and pain. This process is comparable to plant photosynthesis, during which sunlight is absorbed by plants and converted to essential energy for the plants to grow and repair cell damage.

Perfectio X for skin rejuvenation:

the Perfectio x technology gently delivers precise dosage of energy to the skin to simultaneously produce collagen fibers and elastin, while gently erasing signs of aging in all three layers of skin. Naturally filling and erasing fine lines and wrinkles, lifting and tightening the skin. LED light therapy is growing in popularity in prominent medical spas around the world due to its remarkable effect in reversing signs of aging and various skin imperfections. Results from clinical trials demonstrate both efficacy and safety of light therapy in promoting anti-aging skin rejuvenation and intradermal collagen increase when compared against controls. Research also shows that light therapy is highly effective in reducing pigmentation and rosacea.

The Perfectio X offers a unique set of benefits:

- Reduction of wrinkles and fine lines by increasing collagen and elastin production.
- Lifting and tightening of skin.
- Reduction of pigmentation by reducing melanin level.
- Improved redness, skin tone and complexion.
- Reduction of inflammation and pain.
- Increased blood circulation delivering more oxygen and nutrients.
- Safe, non-invasive, chemical-free and FDA-approved technology.
- Scientifically proven high patient satisfaction rates.
- The Perfectio X produces amazing results you just have to see and feel to believe. The two-in-one device, which treats both pain and signs of aging, is actively working to reverse cellular damage accumulating in our body over time. We don't always treat our face and body as well as we should, and now with the Perfectio X by Zero Gravity you have the golden opportunity to reverse that direction towards a healthier, younger-looking you.
